

Fluency

After the mental and oral starter we complete a fluency sum. These are the sums we will be working on regularly but to make sure we stay fluent and not forget how to do them, we complete one sum before we do the main part of the lesson even if that lesson is about shape or coordinates etc.

Complete one sum per from the list below using the number line. You can always make your own sums up that are harder if these are too easy.

Year 2

$$45+23=$$

$$54+27=$$

$$65+35=$$

$$133+25=$$

$$142+19=$$
