

Fluency

After the mental and oral starter we complete a fluency sum. These are the sums we will be working on regularly but to make sure we stay fluent and not forget how to do them, we complete one sum before we do the main part of the lesson even if that lesson is about shape or coordinates etc.

Make your own sums by choosing 2 numbers from the lists below to add or subtract. Choose different numbers each day to create different sums or create your own. Can you add 3 numbers together?

25	46	107	235
87	29	126	453
45	77	169	382
23	65	193	475
19	86	132	529
94	21	109	692
