

Which countries are in which Biome?

For this work you need to look at the two maps on the website, see if you can match some different countries to the Biomes across the world. Look for countries you have visited, or hope too and countries where you may have family and friends. Then list lots of countries names in these boxes, you can change the headings to different biomes if you like.

Grassland <i>Eg. Canada</i>	Tundra
Rainforest	Desert
