

Compare and Contrast

Two more Biomes to look at today, can you match the statements to the correct biome.

Colour the statements about the **Savannah blue** and the **Temperate Forest facts can be green**.

Savannah

Temperate Forest

Hot and dry grassland	Contain trees that lose their leaves	Mild and wet with warm summers and cold winters	Found in places like Brazil, Kenya, northern Australia, Tanzania, Venezuela and Zambia	Two seasons: a dry season (where plants die back) and a wet season (when plants grow quickly)	Found across Europe and in countries like USA, New Zealand, Australia and parts of Japan
